CONVEYANCE.—In transit all goods are at the risk of the purchaser, and no insurance is effected unless we are so instructed. When the route, and mode of transit, and method of consignment is left to us, we do everything in the interest of our customer to forward as expeditiously and as cheaply as possible; but as it is not always possible to make these conditions coincide, we are always glad to have instructions from the purchaser, e.g., as to whether the goods are to go by water or rail, or partly by one and partly by the other; if by water, whether insurance is to be effected or not; if by rail, whether by goods or passenger train; also if the goods are to be booked at any particular rate, such as Grain, Pea, or Agricultural Seed rate.

We do not hold ourselves responsible for any errors which may arise during transit.

FRESH CUSTOMERS will always find us eager to serve them, provided that they send Cash or satisfactory reference with their first order.

EARLY ORDERS are always very much appreciated, as they allow us to make headway with their preparation before the press of the season commences.

ALL TELEGRAMS should be signed, to avoid delay.

KELWAY'S HERO. We recommend this as the finest form of a reliable heavy cropping and long-keeping Onion.

The bulbs are exceedingly handsome when matured, and are continually taking prizes where exhibited. The colour of the skin is a rich tawny yellow or very light brown; the bulbs attain a very great size, and on account of the density in texture of the flesh are of enormous weight; they are of great depth without being swollen at the neck, and thus in shape are between the "globe" and "flat" varieties. We highly recommend it for general use as well as for

## Agricultural Seeds.

All our Stock seeds are saved from specially-chosen transplanted Roots.

For very many years have we been Growers and Selectors upon our own lands near Langport of Special Stocks of Swedes, Mangolds and Turnips, and we honestly believe and state with the utmost confidence that purer or choicer kinds than our Special Sorts have never yet been sold. This refers in proportionate degree to our strains of other varieties. ALL are to be relied upon as the best of their kind, and undergo rigid selection.

Prices and Special Quotations for Agricultural Seeds sent on application.

#### Mangold.

KELWAY'S PRIZETAKER YELLOW GLOBE.

The entire stock was originally selected from

KELWAY'S IMPROVED CORNER'S YELLOW GLOBE. This needs no introduction in the West of England. The stock originated in our neighbourhood, and seed was obtained by us from Mr. Corner himself upon its introduction. Though so near perfection at that time, the great care we have bestowed upon it has evidently been appreciated by our customers ...

KELWAY'S INIMITABLE LONG RED. An immense cropper. We recommend it beyond any for weight, feeding properties, and ease in lifting ... ...

KELWAY'S RE-SELECTED MAMMOTH (or GIANT)
LONG RED. The properties of the original Mammoth
are well-known. This is a very careful selection from
it, having in view the elimination of coarseness whilst
keeping it of a large size ... ... ... ... ...

KELWAY'S LORD OF THE ISLES INTERMEDIATE.

A wonderful improvement upon the ordinary Intermediate, being a more fixed stock of the correct Intermediate type. Very rich in quality and clean lifting

KELWAY'S EXHIBITION GOLDEN TAN-KARD. We have never had greater satisfaction in introducing any sort than we have in recommending this superb variety. It was found amongst our "Model" Golden Tankard, to which it is superior in the dark colour of the skin and the rich golden hue of the flesh. The perfect "Tankard" shape of the original "Model" is retained, together with its highly saccharine quality and extreme solidity of flesh. An enormous weight per acre is obtained from it. Mangold-continued.

#### Swede Turnips. Purple-topped Varieties.

#### KELWAY'S LANGPORT MAMMOTH.

The Hardy Swede.

This variety is an enormous cropper, and one of the most hardy and disease resisting sorts in cultivation, seldom getting mildewed. We have also noticed that it possesses the useful property of growing freely in all kinds of soils. It is as near as possible globe shaped, with a very short neck fully developed, dwarf foliage, and a clean single tap root. It possesses very dense sound flesh. The portion of the root growing out of the ground is of a deep plum colour. We annually save large quantities of this variety entirely from our own stock seed on account of the increasing favour which it meets with. Our stock is still as pure as ever, indeed we think we may say it is improving.

A fine representation of this variety, 2 feet by 3 feet painted in oils from nature, mounted on canvas, and framed, will be sent to all who stock it.—See

annexed illustration.

#### KELWAY'S LANGPORT MONARCH.

The Heavy-cropping Swede N.B.—This should not be confused with a *Monarch* Swede which was introduced to the trade some time after this variety was sent out. The Langport Monarch, is rather higher in the shoulder than the Langport Mammoth, and consequently each individual root is somewhat larger. The upper portion of the bulb is of a bright carmine colour. The flesh is very firm, the top short, and the absence of fibrous or forked roots remarkable. The crop per acre is unsurpassed in weight and quality.
